IONTOF Health, Safety and Environment Policy

IONTOF GmbH is a leading manufacturer of analytical instruments for surface analysis. The company is not only committed to being the most innovative provider of analytical solutions in the field but also to developing and manufacturing products that are safe and environmentally sound throughout their lifecycle. We consider already during the design phase environmental issues like low energy consumption with high priority, and we are convinced that this policy deserves even greater attention in the future in view of the climate change. IONTOF GmbH hence recognizes climate change as a serious concern that requires meaningful action on a global basis to stabilize the atmospheric concentration of greenhouse gases. IONTOF GmbH is convinced that all sectors of society, economy and governments worldwide must participate in finding solutions to the climate change and supports joint efforts to reduce global GHG emissions.

We consider energy conservation and renewable energies to be cornerstones of climate protection and will continue to conserve energy and to improve the energy efficiency of its operations, products and services. IONTOF GmbH also encourages its suppliers to do likewise.

Our highly skilled people are the Company's key resource, and their health, safety and welfare are central to our values. We are committed to preventing injury or harm to persons through our activities and to reducing work-related illness or injury to a minimum. We are proud of our injury-free history and will continue to reduce risks by ensuring that all our employees are well-trained, competent and responsible. By maximising their wellbeing and ensuring their active participation and consultation at all levels of our organisation and by creating a working atmosphere of trust, fairness and openness, we will ensure that our employees will help us to achieve our goals of a safe and healthy working environment.

The Managing Directors have ultimate responsibility for health and safety within the company and are advised by independent health, safety and environmental professionals. The company does not only meet all relevant legal, industrial and other requirements but also sees this as nothing more than a starting point. The company is committed to the continuous improvement of its standards on health, safety and environment. This will contribute directly to our overall business performance and to sustainable growth and will be of major importance for customer satisfaction.

IONTOF GmbH hence pursues defined goals with suitable measures in order to continue to improve the company's performance regarding environmental protection, occupational safety, health protection and quality of products and services.
